Sewer Cleaning and Hydroexcavating Accessories

**Giant Accessories:
Built to Last**

Performance Under Pressure

Shut-Off Guns

- Standard and Linear design for wash down and hydro-excavating.
- Available with 1/4", 1/2" and customer size fittings in brass and stainless steel.

Long Range Guns

- New long range shut off gun and lance assembly
- Handle adjusts the degree of spray

Turbo Nozzles

- Harness the power of a 0° nozzle in a cone or fan shape spray pattern.
- Designed with standard ceramic bearing surface or tungsten carbide.
- 1/4", 1/2" and custom inlet port sizes available

Unloaders

- For small jetting and wash down applications.
- Compact Size - fits directly on the pump with an internal bypass.

Unloaders

- Industrial duty for general sewer cleaning and hydro-excavating.
- Low actuation pressure for less stress on system components

Lances

- Custom sizes available
- 1/4" and 1/2" tubes
- Stainless steel in sizes 6" to 84"
- Molded or vented grips available
- 6000 PSI

Pulsators

- For sewer cleaning applications, the valves help to get the jetting nozzles around the tight corners.
- Available in manual and electric styles.

Relief Valves

- Designed for small and large pump applications to relieve excess pressure in a pump system
- Available in brass and stainless steel.

Built to last for the Sewer Cleaning and Hydroexcavating Market!
