

**DATE:**        *February 2006*  
**FROM:**        *Ed Simon*  
**RE:**            *Shaft Protectors*

The following series of pumps will now have plastic crankshaft shaft protectors: P54, P58, P59, SP Series, MP Series, and LP Series. The bearing covers will have a circular groove, which enables the guard cap to now be mounted by gently tapping it into the groove using a plastic hammer.

These shaft protectors will have new numbers, but the bearing cover part numbers will remain the same. The new shaft protector numbers are:

05312 for SP Series

05375 for MP Series, P54, P58, and P59 pumps

05376 for LP Series
