

TWIN ROTARY NOZZLE DRD 1000 bar

Z 46-6e

01.01.2017

Seite/Page 1/1

Ideal application area of the DRD rotary nozzle is in the case of heaviest deposits as well as in the case of pipe bundles. (Power stations, refineries, etc.).

The front rotating part releases the deposits, which are moved backwards by the rear-end rotating part.

This is a great time saver.

Above D 40 mm = The Twin rotating nozzles are equipped with an adapter M 24x1.5 male.
