

Models 25160 & 25165

Pressure Regulator Valve

Operating Conditions

25160

	<u>U.S.</u>	<u>Metric</u>
Maximum Flow:	10.6 GPM.....	40.0 L/min
Maximum Pressure:.....	3990 PSI	275 Bar
Maximum Temp.:	194° F	90° C
Inlet Port:	3/8"	
Outlet Port:	1/4"	

25165

	<u>U.S.</u>	<u>Metric</u>
Maximum Flow:	10.6 GPM.....	40.0 L/min
Maximum Pressure:.....	1450 PSI	100 Bar
Maximum Temp.:	194° F	90° C
Inlet Port:	3/8"	
Outlet Port:	1/4"

Repair Kit

Kit Number
09740

***Parts Included in Kit**
10, 12, 15, 16, 17, 20, 21, 22

Valve Dimensions - mm (in)

Operation

- Read the manual carefully before operating. Giant Industries is not liable for damage resulting from improper operation or handling of this product.
- Adjust the spring (3) tension via the nut (1).
- Installation and maintenance must be performed by qualified personnel.
- The valve is only for use with clean, fresh water with mild detergents. Acids, alkalines, or abrasive fluids may not be used unless approval in writing is obtained before operation from Giant Industries, Inc.
- The valve is to be mounted downstream of the bypass valve, before a boiler.
- The valve is to be mounted downstream of the bypass valve, before a boiler.
- Finally, remember that high pressure operation in a pump system has many advantages. But, if it is used carelessly and without regard to its potential hazards, it can cause serious injury.

Maintenance

- Only use original Giant Industries spare parts (see first page for valve repair kit) for maintenance work.
- Before maintenance, be sure that all pressure is relieved from the valve.
- Maintenance should be carried out based on the frequency of use of the machine the valve is mounted on. Be sure to replace the seals and spring as necessary.
- For proper installation, observe the exploded view shown on the first page.
- Before reassembly, lubricate all seals with silicone grease.

Instructions:

1. Remove nut (1), disc (2), and spring (3).
2. Remove stem assembly (5).
3. Remove inlet nipple (11), o-ring (12), spring (10), ball (9), and seat (8). If seat is worn and has to be replaced, put an easy out in seat and remove seat.
4. Remove nut (23) on stem (13), and remove retaining ring (19).
5. Remove the stem (13) from nipple, then remove back-up ring (16) and o-ring (17) from nipple.
6. Check the O-ring (18) on stem (13), and replace if necessary.

WARNING: This product might contain a chemical known to the State of California to cause cancer, and birth defects or other reproductive harm.
